Chapter 5 Advance Service

Advanced services include configuration of system time and time server.

5.1 System Time

1. Click Config->Advance Service->System Time.
2. This page configures the system time and time zone, you can synchronize the local computer time.

The screenshot shows a web interface for configuring system time and time zone. On the left is a navigation menu with categories like System Management, Port Management, Basic Service, and Advanced Service. Under Advanced Service, 'System Time' is selected. The main content area is divided into two sections: 'System Clock Setting' and 'Timezone Setting'. The 'System Clock Setting' section shows the current system time as 'Sun 2000/02/27 05:43:31 UTC +08:00'. It has input fields for 'New Date' (set to 2021/1/1) and 'New Time' (set to 13:55:53), each with a 'Get From PC' button. Below these are 'Config' and 'Refresh' buttons. The 'Timezone Setting' section has a 'Select Timezone' dropdown menu and 'Config' and 'Refresh' buttons.

Figure 5-1

5.2 DNS Client

1. Click Config->Advance Service->DNS Client
2. This page configures the IP and domain name of the time server (need to be configured in unicast mode).

The screenshot shows the 'DNS Client Configure' page. The left navigation menu has 'DNS Client' selected under the 'Advance Service' category. The main content area has a 'Name Server IP Address' field with the value '0.0.0.0' and a 'Config' button. Below this is the 'Domain Name Lookup' section, which has 'Domain Name' and 'IP Address' input fields and a 'Lookup' button.

Figure 5-2

5.3 SNTP

1. Click Config->Advance Service->SNTP
2. This page configures the SNTP.

Figure 5-3

5.4 Access List

5.4.1 Classifier

1. Click Config->Advance Service->Access List->Classifier.
2. This page configures the ACL Classifier.

Figure 5-4

5.4.2 Policy

1. Click Config->Advance Service->Access List->Policy.
2. This page configures the ACL Policy.
